

Day	Time	CLASS	DESCRIPTION	AGE GROUP	Begins	Ends
Mondays	6:00 PM	Linklater Technique	Training the voice and body to be a transparent channel where thoughts and feelings may be expressed. It consists of a progression of exercises that aim to free the natural voice from physical, mental, emotional and energetic blocks developed over the course of one's life. The goal is to release a voice that is free, expressive, evocative and powerful. At the core of the teaching is the idea of a "classical self"—a larger self that is able to embody and express all human experiences and allows actors to metamorphose into any imagined character (human or otherwise), while building the actor's emotional veracity.
